Upcoming Trade Shows

Insulation Solutions is almost finished with the 2015 trade show season! We only have two more shows, both being held in October.

Come see us in St. Louis, October 1st & 2nd at the America's Center. We are **Booth #1111** and will be showcasing our under-slab vapor barrier line of products, **VIPER!** For FREE exhibit hall admission, please [click here](#). For more information about the Construct Show, please [click here](#).

Feeling Lucky? You can also come see us in Las Vegas, Nevada October 1st & 2nd at the Red Rock Resort & Casino.

Insulation Solutions will be at booth #308 with several innovative insulation products on display. Come check out our recessed light covers, the **Insullite**. For more information regarding the ICAA show please [click here](#).

Project Profile: Viper CS: Daniel Island, SC

This month's featured project profile is a beautiful home in Daniel Island, South Carolina. [Viper CS](#) and [Insul-Barrier](#) were some of the Insulation Solutions products used on the project.

One of our local distributor companies, Insulation Materials, LLC, provided the materials.

Viper CS, shown below, is a great way to clean up your crawl space!

Viper CS is a white, cross-woven polyethylene vapor barrier designed specifically for controlling moisture migration in crawl space applications. Its bright white color will give any crawl space a fresh, clean look while also combating the harmful effects of radon, moisture causing wood rot, mold, mildew, odors and poor indoor air quality.

Eliminate moisture and reduce humidity by encapsulating your crawl space with Viper CS. Promising performance and longevity, Viper CS is specifically designed for your crawl space and your peace of mind.

Viper CS is a 10-mil product and is available in a standard roll size of 12' x 200'. Custom sizes and printing available.

2016 Trade Shows

INTERNATIONAL ROOFING EXPO 2016

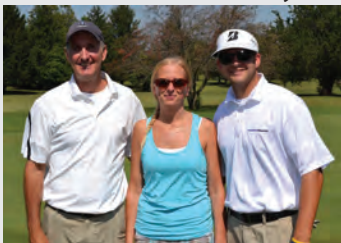

-Orlando, Florida
-February 17-19
-Booth #1687

8th Annual Insulation Solutions Golf Outing

On Wednesday, September 16th, twenty-one Insulation Solutions employees teed it up for our 8th annual company golf outing.

A fun time was had by all!

Congratulations to the winning team: Aaron K., Heather B. and Kendall C.

Shown below is a photo of the Insul-Barrier, the insulation and vapor barrier in one for crawl space applications. Read more about Insul-Barrier in the Product Spotlight section of this newsletter.

Product Spotlight: Insul-Barrier

Insul-Barrier is an insulated vapor barrier designed specifically for use in the crawl space. The patented reflective technology and configuration creates optimal thermal performance while also preventing any unwanted moisture from migrating into the living or working space. Insul-Barrier's 4' x 25' rolls are easy to handle and maneuver in tight spaces.

Insul-Barrier is great for crawl space foundation insulation, crawl space vapor barrier as well as new and retrofit construction. This patented, reflective technology addresses all three modes of heat transfer and acts as a "Class A" vapor barrier in accordance with ASTM 1745.

The configuration of Insul-Barrier includes white, cross-woven polyethylene, reflective aluminum, bubble, HD closed-cell foam, white cross-woven polyethylene and a final layer of reflective aluminum.

Nu-Age Films 10+ Receives ICC-ES Approval

Nu-Age Films 10+ recently received a building product listing ESL #1033 from ICC Evaluation Services (ICC-ES), providing evidence that the engineered film/vapor retarder meets consensus standards/requirements in the I-Codes. Building officials, architects, contractors, specifiers, designers and others utilize ICC-ES Building Product Listings to provide a basis for using or approving Nu-Age Film 10+ in construction products under the International Building Code®. Nu-Age Films are high performance engineered films used in everyday commercial, industrial and agricultural applications. Please [click here](#) to view the report.
