Product Spotlight: Wraptor House Wrap

Wraptor is a breathable, cross-woven polypropylene house wrap that helps prevent wall sheathing from soaking up moisture that gets behind the exterior cladding (vinyl siding, brick, etc.). Its cross-woven quality gives it extra strength to help prevent tearing from the building after installation.

Standard Sizes: 3', 9', 10' x 100', 150'

Custom Sizes and Print Available

PRIVATE LABELING

Company Branding Opportunities

We offer private label and personalization for the Wraptor house wrap product line. Private label house wrap is a cost-effective way to advertise your business on every job. Put your company or customers' name and/or logo on high quality house wrap.

By providing ISI with logos, designs and other specifics we will help create a Custom Private Label that will proudly represent and market your business.

Take your company to the next level with private labeling.

WRAPTOR TAPE

House Wrap Seam Tape

Applying Wraptor Tape to joints and seams during house wrap installation will help to provide a continuous barrier against water and air infiltration. This versatile tape can be used for a variety of jobs and applications.

Standard Size 2" x 55 yd.

WRAPTOR FLASH

House Wrap Flashing

Wraptor Flash is a self-adhesive, self-sealing tape for flashing around windows and doors and for sealing building joints. The tough, aluminized, multi-layer polymer film is coated with specially formulated rubberized asphalt. This aluminized film can be exposed to the sun without effect for up to six months. Wraptor Flash features an easily removable silicone release paper to protect the adhesive surface. The adhesive is very aggressive and adheres to most clean, dry surfaces. Its waterproofing compound self-seals around punctures from nails, screws and staples.

Standard Sizes: 4", 6" x 100'
