BAFFLO

VENTILATION BAFFLE

The Bafflo is a corrugated cardboard product designed to enhance attic ventilation and increase the efficiency of insulation. It allows the installer to blow insulation all the way to the top plate without interfering with the soffit. It also prevents batt blow-outs caused by wind.

BENEFITS

- Saves energy by protecting insulation
- Eliminates batt blow-outs
- Easy to install
- Meets new energy code requirements
- Manufactured in 16" and 24" widths

"The Bafflo is a great alternative to other standard vents. They are extremely cost-effective and easy to install. They can be adjusted to fit the specifications of any job. I highly recommend this product. It's just what is needed to prevent annoying batt blow-outs."
