

## *Customer Satisfaction*

"I have the Insul-Tarp under® my machine shop with 6 inches of concrete and (2) 26,000 lb machines on top of it. It performs great! I wish I had used it in my log cabin. "

-Tony Sturchio  
Homeowner  
Caroga Lake, NY

"In January of 2000 we did our first system with Insul-Tarp®. We used it in a 2,500 square foot log home on Tennessee Pass in Colorado. The house is located at about 11,500 feet in elevation. Upon returning to the job site the next morning at about 8:30 a.m., we found that during the evening sometime the system had come up to temperature and satisfied the thermostat which was set at 75 degrees."

-Martin L. Naffziger  
Home Heating Systems  
Buena Vista, CO

"Insul-Tarp® is our product of choice for under-slab insulation for radiant heating because it allows us to better manage our project, save labor on installation and provide a comfortable heating system for our clients."

-Steve Gilmore  
Belyea Brothers Heating & Cooling  
Toronto, Ontario, Canada

"I recommend the product highly and find it to be a profitable part of our product line. We look forward to expansion of our marketing with Insul-Tarp®. I think it has huge potential in all phases of the construction market."

-Doug Mossbrook  
President Eagle Mountain, Inc  
Canandaigua, NY

"Our customers that have tried the Insul-Tarp® product know that it works. We look forward to the continued use of this product as one of our primary lines in radiant heating. Thank you for providing a product that does what it is supposed to do."
