To Whom It May Concern,

This is a letter explaining a little bit about the usage of Insultarp at our place of business, United Plumbing. We notice that there is an incredible amount of labour savings due to the fact that you can just unroll tarp and place in position, (savings of 2 men, 4hrs of labour, depending on size of slab). With regards to the complete package, the insultarp value being 2" Styrofoam can not compare to Styrofoam, it's easier to handle, install especially efficient for snow melt applications. We have not had any problems with performance. It has been used under concrete and under interlock stones.

When compared to the cost of Styrofoam and the cost of installing and cutting Styrofoam it is much more cost efficient to use insultarp.

Regards,

*Carlo Serapiglia
