

# RADIANT SHIELD® Pro Plus

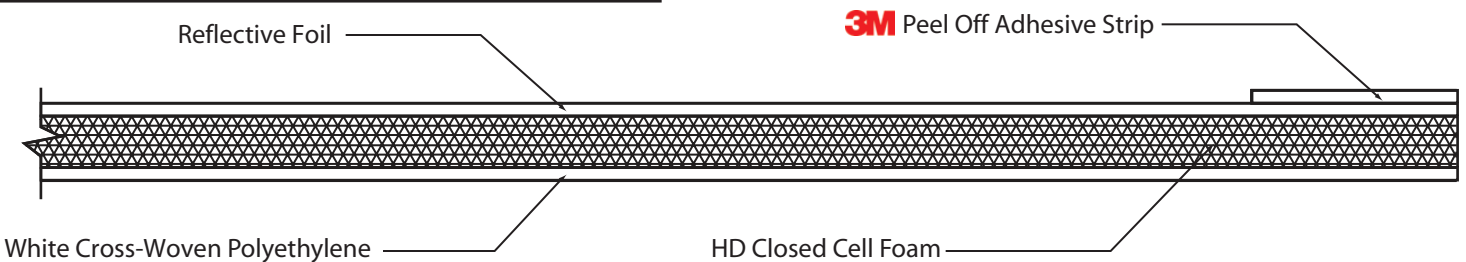

**Product Description :** White cross-woven polyethylene, high density closed cell foam, low emissive reflective foil. Material contains a 3M peel off adhesive strip along the entire length of the roll. Roll width is 74" to allow for easy installation at the seams.

**Roll Size:** 74" x 300'  
**Weight:** approx. 60 lbs/roll

Due to the 74" wide rolls, at least 2" of insulation always extends beyond the edge of the metal decking. This spacing gives the installer adequate room to safely and securely fasten the next run of insulation using the peel off adhesive strip technology.
