

THE SHOOT™

INSULATION INSTALLATION SYSTEM

For Spray Applied Insulation

BENEFITS

- The Shoot is designed to be easily installed between framing to provide a perfect fit and create a form to apply insulation
- The Shoot is lightweight and easily installed by one person
- The Shoot is easily modified in the field in a quick and effective manner to fit any size opening
- Because The Shoot is installed between the framing, it eliminates working around bracing, wiring, plumbing and other obstructions
- The Shoot is adjustable to any depth minimizing any scarfing
- All work is done from the floor, eliminating labor costs and increasing profits.

THE SHOOT™

INSULATION INSTALLATION SYSTEM
For Spray Applied Insulation

The Shoot is a patented, effective way to insulate open framed areas in new construction applications of residential and commercial buildings, as well as room additions and remodeling projects.

The Shoot has been researched and developed to be the perfect tool for the spray foam insulation industry. It is 6' in length and manufactured to fit 16" and 24" on center openings. With several scored edges, it can also fit odd sized openings.

FIRE RETARDANT SHOOT AVAILABLE!
