Ryan,

I wanted to write to you today to thank you for such a great product, the Quip. My brother-in-law talked me into installing floor heat in the basement and the garage of my new house. As an accountant by trade, I'm all about saving a buck, so I thought I would do it myself. I am not a contractor or an in-floor heating specialist, just a homeowner who likes the do-it-yourself stuff.

I had helped install tubing once before and I will confess, I was not looking forward to crawling around with a baggie of zip-ties. When I heard of your product, I jumped at the chance to help save my knees. I was NOT disappointed.

The Quips were fast and VERY easy to install, even one handed as you are wrestling with the piping. You don't have to be an expert, in fact the Quips can make you feel like a pro, with the speed and ease of installation. You saved my back, my knees and I got my garage completely done; that is insulation to pressure testing, in less than 3 hours.

In addition, with the Quip tips, you showed me how I could completely eliminate zip ties, even on the curves. I am a huge fan, and I can't wait to pour the concrete in my shed. Everyone who is considering in-floor heat should use this product, it is truly a time and labor saver. Thanks again for the great, simple product.

Sincerely,

Dan Keyt
